John--the glitch appears to be they're using "+" when they should be using "-" and vice-versa.

On Tue, Jun 9, 2015 at 7:59 AM, Nordine, John <nordine.john@epa.gov> wrote:

Bob,

Jack is working with the software company that he uses for water level tables. They do not know what the glitch is yet.

John--they have adequately addressed the original comments.

However, the graph of water levels in well DGW-2I appears to be showing increased water level when it should be showing decreased water level, and vice-versa. This error in the plotting needs to be corrected in this submission and ALL previous submissions.
